

Mr. French called the Bristol Township Zoning Hearing to order at 6:31 PM with the following trustees' present and answering roll call:

Mr. Seemann, absent

Mr. French, yes

Mr. Webb, yes

Guests

Matt Lynn, Ken Weeks, Carol Bowlin, Ellen Gordon all were observing.

Trustee French read the Zoning Commission proposed recommendations for section 31, Concrete Driveways. Delete the word Concrete add additional text, paragraphs 2, 3, 4, 5, and 6 as follows:

2. The driveway width should be no less than ten (10) feet in width.
3. Private bridges are where a private road or driveway crosses a river, stream or other waterway. The bridge must support no less than 25 tons. Federal law describes a bridge as any span of 20 feet.
4. A zoning certificate, here will be no charge for the certificate, must be obtained from the Bristol Zoning Inspector before the installation of a bridge.
5. The property owner must fund the bridge project and all inspections. The property owner must have it inspected by whoever Trumbull County uses at that point in time upon completion and every 5 years after. The phone number for the Trumbull County Engineer is (330)675-2640 for information on current inspectors.
6. A copy of the permit must be displayed on the bridge or a copy given to the Bristol Fire Chief. Failing to comply with required inspections could result in altered emergency response.

Trustee French asked for any questions concerning the proposed changes to the text for section 31, Concrete Driveways.

Trustee French read the proposed amendments to Section 28 Outdoor Swimming Pools, recommendations by the Zoning Commission for additional text to paragraphs 1,2B,3,4,6 and 7 as follows, underlined sections are the proposed additions.

#### **SECTION 28: OUTDOOR SWIMMING POOLS**

1. Definition: That for the purpose of this supplement, an "OUTDOOR SWIMMING POOL" is defined as any artificial water pool constructed of steel, masonry, concrete, aluminum, plastic, or any other material located out of doors, either above or in ground, which has a square foot surface area of four hundred and fifty (450) square feet or more, or a water depth at any point of more than two and one half ( 2 1/2) feet, or both. Temporary pools are pools that are only used during the summer season and removed during the off season (Fall, Winter and Spring) and do not

require a fence. If not taken down it will be considered permanent and rules apply.

Instructions for calculating square footage of a pool:

Measure the length of the rectangular or square pool. Measure the width. Multiply the length by the width of the pool to find the square footage. For instance, 15 feet (length) times 12 feet (width) equals 180 square feet.

Measure a round pool across to find the radius, which is half the diameter. Find the square footage by multiplying the radius times the radius times 3.14 (pi). For instance, 14 feet (radius) times 14 feet (radius) times 3.14 (pi) equals 615.44 square feet.

Calculate the square footage of a L-shaped pool by dividing the pool into two rectangular or square sections. Measure the length and width of both sections and add the square footages (using step 1).

If one section is 12-by-10-feet and the other is 12-by-10-feet the result will be 120 plus 120 square feet equals 240 square feet.

Find the square footage of an oval pool by measuring the width and length at the center. Divide the two measurement by two to find the radii. Multiply the long radius by the wide radius by pi (3.14) to find the area. For instance, if the measurements are 30 feet long by 16 feet wide, the calculation would be 15 feet (length) times 8 feet (width) times 3.14 (pi) equals 376.8 square feet.

Any pool that does not meet the above described criteria, square foot surface area of four hundred fifty (450 square feet or more, or a water depth at any point of more than two and one half ( 2 1/2) feet, or both and/or is disassembled when not in use is defined as a temporary pool.

2. Compliance required:
  - A. That no outdoor swimming pool, which is not enclosed in a permanent building or like structure, shall be constructed or maintained in the Township unless and until the requirements and conditions of this supplement are complied with.
  - B. Zoning certificate required. That no pool regulated by this chapter shall be hereafter constructed or established unless a certificate to do so is first obtained from the Bristol Township Zoning Inspector. A copy of Section 28 is to be provided to the applicant for the swimming pool. The owner of the property is responsible to insure all requirements of

this section are adhered to. All Trumbull County Building Department Regulations pertaining to swimming pools are to be followed.

3. Distance between pool and property line. That every outdoor swimming pool hereafter built, must be so located upon the lot or parcel as to allow a safe distance between the pool and the property lines. A distance of fifteen (15) feet from each property side line and rear line and ten (10) feet to the rear of the main building to which said pool is accessory shall be presumed a minimum safe distance for such purpose. No pool shall be located in a front yard.
  
4. Fence required. That every outdoor swimming pool heretofore or hereafter constructed shall have erected around it a barrier (lockable or removable ladder) or fence with shall be of rigid construction and which shall be not less than four (4) feet in height, shall extend to within four (4) inches of the ground and shall contain, except for gates, no openings larger than six (6) inches square. Gates shall be securely locked when such pool is not in use by the owner thereof, or anyone using the same with the owner's permission.
  
5. Conformance to natural grade. That every outdoor swimming pool hereafter constructed or created must substantially conform to the natural grade of the surrounding land, and no part thereof, other than a diving board or similar equipment or the fence referred to in subsection thereof, shall be higher than four (4) feet above such grade.
  
6. Drainage. That every outdoor swimming pool shall be so constructed that it can be drained into a township storm sewer or shall have a sump located in its deepest part, for the purpose of pumping out all of the water into a sewer opening, sump well, or other adequate drain opening. Drainage on private property is permitted as long as the private property has enough acreage to sufficiently disperse the water. Draining into a natural water way is not permitted as the chemicals used to treat pool water may disturb the wildlife in the body of water. In no case shall the pool be drained directly or indirectly onto an adjacent property. If the water must travel a distance where a drainage pipe is necessary, the pipe must be made of solid material and be located no less than fifteen (15) feet from the property line and if left in place longer than one year must be buried below grade using county plumbing codes.

7. Recirculation and filtration. That every outdoor swimming pool that is not drained daily shall be equipped with a recirculation system capable of filtrating the entire contents of the pool in 24 (24) hours or less.

Trustee French asked for any questions concerning the proposed text changes to Section 28.

Scott Maky and son Zachery were present and Mr. Maky asked, "How do we determine the amount of acreage sufficient for drainage onto private property?"

There was much discussion concerning this and it was decided that the trustees would act on this at the August 4<sup>th</sup> meeting after having more time to look further into some of the proposed text changes.

Mr. French stated the Trustees must act on the proposed amendments within 20 days of the Hearing.

Mr. Webb moved to adjourn at 6:50 PM. Mr. French seconded the motion.

Motion Carried
